

Hi everybody, here is a list for our box making session; if you can think of any additional items please let me know.

See you soon Regina studiogreen@outlook.com

Box- making material

Mounting card or similar card weight (about 1.5 - 2mm thick)
this also depends on the size of the box (you might get away with a thinner card used for a smaller box).
You can also use thinner cardboard for the inside of your box (empty cereal boxes...)
Use the templates to cut out your pieces; it is best to use a craft knife if you have one, but check the size of the printed pieces first (check length and corners...) also check that the inside pieces are slightly smaller than the outside ones, it helps to label your cards.

Wadding if you like (not too thick)

Fabric to cover your cardboard
the seam allowance is about 1 cm; a bit more if you use wadding.

Lining fabric, to cover the inside cardboard, can be the same or a different fabric...

Glue to stick the fabric onto the board, this can be a Pritt Stick or fabric glue stick works very well: Sewline or Prym Aqua Marker (I bought one at Amazon....)

Stronger glue to stick cards together

Pegs are very good if you have

Thread to hand stitch, colour matching your outer fabric and if possible polyester

Sharp sewing needles, get a couple of long and short ones, so you can try out what works best for you.

We will be using a whip stitch to join the pieces together (stitches go through the fabric only)

Pencil, ruler, scissors.....

If you make a sewing box you might want to use **elastic band** to hold a scissor and **extra fabric for pockets inside and also the gussets!**
